Good Afternoon Chris,

Thank you for the email and offer. I should have some desk time later this week to locate previous well sampling results and respond to your email.

Subject: Private Well Sampling Along Haskell Lake

Hi Kristen:

I was thinking some more about what other tasks we should try to get accomplished this summer and private well sampling came to mind. Looking at a Vilas County land info map, it appears that there would be 3-4 locations along the north end of Haskell Lake that would be candidates to have their wells sampled:

- 14299 W. State Hwy. 70
- 1285 Haskell Lake Landing Rd.
- 1235 Towerview Ln.
- 1175 Towerview Ln.

I don't know for sure if all of these addresses have private wells, but for those that do, it seems like it would be a good thing to grab a VOC sample from them during the next scheduled groundwater sampling round. Obtaining well construction/depth information would likewise be a good idea. I would also like to have the wells serving the Haskell Lake Lodge and Tower Standard (if possible) sampled. REI would likely need your assistance in gaining access to sample some of these wells. If you are in agreement, I'll ask REI to include the private well sampling in the next sampling event, utilizing EPA Method 524.2 for the drinking water samples.

Also, from what I recall, your department might have contracted for some private well sampling as part of the initial fireworks stand investigation. Were any of the above mentioned wells sampled, and if so, could you share those results?

Just let me know if you have any questions. Thanks.
